Changing Content

Content

Text

```
<p>this is the content</p>
```

HTML

```
<p>
  this is the
  <span>content</span>
</p>
```

Selection

```
let selection =
    d3.select("p")
```

D3 API Pattern

Get

something
`.method``()`

Set

something
`.method``(value)`

API | *selection*.text

Syntax:

```
selection
    .text([text])
```

Example

`<p>`this is the content`</p>`

```
d3.select("p")
  .text("this is the content")
```

API | *selection*.html

Syntax:

```
selection
    .html([HTML])
```

Example

```
d3.select("p")
  .html("This <b>content</b>")
```

```
<p>
  This <b>content</b>
</p>
```

Changing Content

selection`.text`

selection`.html`
